

**ADDENDUM # 1**  
**Naperville Public Library**  
**Interior Painting & Patching RFP**  
**Questions thru November 2, 2018**

1. Can the painters take the cove base off?
  - Yes, the painters will remove the cove base from all wallpapered walls. A flooring contractor will reinstall at later date.
2. Who will remove the panels off the folding wall for papering?
  - The folding wall is eliminated from the scope of this work. Please do not include it in your pricing. The total square footage of wall paper in this project's scope of work is approximately 3,600 square feet instead of the original 4,900 listed for the Alternate pricing.
3. Would you consider painting the glass panels? Removing them without breaking will be very hard.
  - The installation of the glass panels is eliminated from the scope of work. We have the following change: the vendor will demo the glass panels, prep the wall appropriately and paint that area. That square footage for painting increases by approximately 100 square feet.
4. Do we remove the corner guards?
  - No, you do not need to remove the corner guards.
5. Have you considered painting the wall paper?
  - We have decided not to pursue this as an option.
6. Do you require union labor?
  - The Library does not require union labor, prevailing wage is required.
